

BIOMETRIKA VOL. 94, NO. 1

CONTENTS

PAGE

TAYLOR, J. E., WORSLEY, K. J. and GOSSELIN F. Maxima of discretely sampled random fields, with an application to 'bubbles'	1
YUAN, M. and LIN, Y. Model selection and estimation in the Gaussian graphical model	19
KUROKI, M. Graphical identifiability criteria for causal effects in studies with an unobserved treatment/response variable	37
THOMPSON, E. A. and GEYER, C. J. Fuzzy p -values in latent variable problems	49
OLLER, R., GÓMEZ, G. and CALLE, M. L. Interval censoring: identifiability and the constant-sum property	61
SEN, B. and BANERJEE, M. A pseudolikelihood method for analyzing interval censored data	71
ABBING, J. H. and VAN DEN BERG, G. J. The unobserved heterogeneity distribution in duration analysis	87
SAMIA, N. I., CHAN, K.-S. and STENSETH, N. C. A generalized threshold mixed model for analyzing nonnormal nonlinear time series, with application to plague in Kazakhstan	101
MA, Y. and HART, J. D. Constrained local likelihood estimators for semiparametric skew-normal distributions	119
BAYARRI, M. J. and GARCÍA-DONATO, G. Extending conventional priors for testing general hypotheses in linear models	135
RATHBUN, S. L., SHIFFMAN, S. and GWALTNEY, C. J. Modelling the effects of partially observed covariates on Poisson process intensity	153
CHANDLER, R. E. and BATE, S. Inference for clustered data using the independence loglikelihood	167
LIANG, H., WANG, S. and CARROLL, R. J. Partially linear models with missing response variables and error-prone covariates	185
CHAUDHURI, S., DRTON, M. and RICHARDSON, T. S. Estimation of a covariance matrix with zeros	199
KONG, E. and XIA, Y. Variable selection for the single-index model	217
YOO, J. K. and COOK, R. D. Optimal sufficient dimension reduction for the conditional mean in multivariate regression	231
MISCELLANEA	
GOUDIE, I. B. J., JUPP, P. E. and ASHBRIDGE, J. Plant-capture estimation of the size of a homogeneous population	243
